Over 5000 lines:
• Shell • Python • JavaScript, HTML• CSS • Bootstrap
Over 1000 lines:
• React • Flask
Familiar:
SQLite• PostgreSQL• MySQL

OPERATING SYSTEMS

•Windows •Linux •Mac OS

PROJECT WORK

FLASKMARKET WEBAPP

Mar 2024|SKILLS — HTML, CSS, PYTHON, FLASK, SQLite

- It represents the online store
- This Flask web application includes essential user functionalities such as registration and login, allowing users to securely buy and sell items.
- It ensures security by saving passwords in the database as encrypted text.
- This is achieved using hashing algorithms, such as bcript, to encrypt passwords before storing them, provinding robust protection against unauthorized access.

NETFLIX-CLONE

Jan 2024|SKILLS — HTML, CSS, React

- It represents the Netflix app
- It features a Movie and Shows listed in different categories
- It plays a trailer of a show that you choose with the help of API

NOTE-KEEPER WEBAPP

Dec 2023|SKILLS — HTML, CSS, JavaScript

- The Note Keeper project leverages HTML, CSS, and JavaScript to create an intuitive web application for managing and organizing notes.
- Users can easily create, edit, and delete notes,
- With a clear and user-friendly interface designed for seamless interaction and efficient organization.

Meme-Generator

Oct 2023|SKILLS — HTML, CSS, React

- A simple and fun meme generator build with React that fetches random images from an API.
- Users can add their own text to create and sharp unique memes.
- The application uses React hooks for state management and fetches images from an external API to ensure fresh diverse content.

NewsGrid-Clone

Aug 2023|SKILLS — HTML, CSS

- This project features a visually appealing grid layout for news articles, complete with semantic HTML structure and CSS styling to ensure a pleasing and organized presentation of news content.
- The project's responsiveness guarantees it looks great on various devices, and it serves as a testament to my HTML and CSS skills in creating user-friendly, grid-based web layouts.

PRODUCT-LANDING-PAGE

Jun 2023|SKILLS — HTML, CSS

- A sleek and modern product landing page crafted using HTML and CSS.
- The page is designed to showcase products effectively, ensuring seamless user experience across all devices.
